

As we age, there are certain things inevitable as part that process

For Men

- Over the age of 50, 50% will have some form of prostate enlargement symptoms
- By age 70, 90% will be symptomatic with prostate conditions
- Men die significantly more frequently from heart conditions compared to women

For Women

- May improve immune system function
- May have cardio vascular protective effects

Suggested dosage 3 dsps per day by itself, or take with with honey, in smoothies or in water.
